

## Dark Color Release Form

Counter Solutions requires the end user to sign a waiver whenever dark colors are used in high traffic areas, such as kitchen or commercial countertops.

The formulation used to manufacture the darker colors is the same as all other colors. However, dark colors are prone to show scratches, dirt, grease, and water spots more commonly than lighter colors.

For these reasons, Lumbermen's policy is to have a signed copy of this notification prior to your countertop's installation.

This waiver serves as a written document to be included in the warranty file stating that Lumbermen's has informed the end user of such possibilities when using any dark color.
